Projects

CodeAssist – Full-Stack Web Application

[Github](#) | [Live Project](#)

Tech: Next.js, React, Tailwind CSS, Node.js, WebSockets, PostgreSQL, Prisma, Azure, Nginx , pm2

- Built and deployed a production-grade full-stack application using Next.js App Router, Node.js, and WebSockets with real-time communication
- Implemented secure OAuth-based authentication using NextAuth.js (Google & GitHub), including protected routes and session handling
- Architected and deployed frontend, backend, and database on an Azure Linux VM, managed with PM2 and Nginx reverse proxy
- Designed relational schemas and handled Prisma migrations, resolving permission and production database issues
- Debugged and optimized production-only failures (OAuth callbacks, WebSocket breaks, mixed content, memory limits), ensuring system stability

Weather & Horoscope App
